## PROJECTS

[VIEW MORE...](#)

### FLICKER - SOCIAL MEDIA WEB APPLICATION

03/2024

- Enabled log in/sign up, friend requests, and post creation.
- Allowed profile picture upload and updates, and user-specific profile pages.
- Developed a responsive interface with user-friendly widgets and theme modes.
- Implemented authentication & authorization for user security.

### PHOTO TAGGING GAME

12/2023

- A 'Where's Waldo?' style game where players find and tag characters in illustrations.
- Implemented character, pixel position, and marker system with three levels of difficulty.
- Included a timer, leaderboard system, and level completion form.
- Ensured compatibility across different screen sizes with normalized coordinates.

### WEATHER APPLICATION

07/2023

- Crafted a user-friendly application that delivers real-time weather conditions and forecasts globally.
- Applied Open Weather API for global weather forecasts.
- Provided a five-day forecast with various weather properties.

### PHARMACARE SYSTEM TAFE Queensland

12/2018

- Created a secure web page for hospital staff to monitor patient prescriptions.
- Developed a database for managing patients, appointments, and medication.
- Ensured privacy and security by allowing access only to authorized personnel.

## EXPERIENCE

### GROCERY TEAM MEMBER/SUPERVISOR Woolworths

11/2019 - Current

- As a Supervisor, I managed multiple tasks and led a team to complete department routines efficiently and on time.
- Participated in team meetings to discuss departmental objectives, similar to sprint planning in Agile methodology.
- Utilized RF Gun/Scanner for inventory control, analogous to database management
- Solved daily operational challenges, showcasing problem-solving abilities.

### WEB DEVELOPER TRAINEE Be IT Safe

03/2017 - 11/2017

- Provided comprehensive communication and services, addressing client inquiries and resolving technical issues promptly.
- Programmed in HTML, CSS, JavaScript & PHP.
- Worked with Laravel framework for Web Apps.
- Applied Agile project management techniques.
- Collaborated, communicated, and contributed in team settings.

## EDUCATION

### FULL STACK WEB DEVELOPER COURSE The Odin Project

03/2024

- Developed a deep understanding of JavaScript, building both front-end and back-end web applications.
- Utilized React for creating dynamic user interfaces.
- Gained knowledge in data modeling, API usage, and server-side programming with Node.js & Express.js.
- Understanding of modern web standards and best practices.

### INTRODUCTION TO MONGODB COURSE MongoDB University

11/2023

- Gained skills in MongoDB and CRUD operations.
- Learned aggregation, indexing, and transactions in MongoDB.
- Applied MongoDB skills to real scenarios.

### DIPLOMA OF SOFTWARE DEVELOPMENT TAFE Queensland

12/2018

- Produced and tested software programs using various programming languages and tools.
- Designed web-based products, analyzed system needs, debugged applications, and developed databases and cloud services.
- Fostered team leadership skills, communication, and strategic planning.

### CERT III: Information, Digital Media Australian College of Information Technology

12/2017

- Integrated SEO and social media marketing into website design and digital strategy.
- Contributed to computer maintenance, developed skills from web development, and applied Photoshop and e-marketing skills.
